

SHREEYA KALEBERE

SOFTWARE ENGINEER x AI ENGINEER

B.Tech Computer Science & Engineering | D.Y. Patil College of Engineering & Technology

CGPA: 9.6 / 10 | Academic Standing: Rank 2nd among 287 students (Top 1%) | Class of 2027

GitHub: <https://github.com/ShreeyaKalebere> | LinkedIn: <https://linkedin.com/in/shreeya-kalebere>

PROFILE SUMMARY

Dedicated Computer Science Engineering student focused on building robust full-stack software and intelligent AI/ML systems. Combining deep software engineering fundamentals (DSA, systems, OOP, DBMS, MERN) with applied computer vision (YOLO, OpenCV, PyTorch) and autonomous agent architectures.

EDUCATION & ACADEMICS

Bachelor of Technology (B.Tech) in Computer Science & Engineering

D.Y. Patil College of Engineering and Technology | Expected Graduation: 2027

CGPA: 9.6 / 10.0 (Rank 2 / 287 in Department)

Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, OOP, Web Development, Computer Networks, Machine Learning, Python Programming, Network Security, Robotics, AR/VR.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, SQL

Software & Web: React, Node.js, Express.js, MERN Stack, REST APIs, Git, GitHub

AI & Computer Vision: Machine Learning, Computer Vision, YOLO, OpenCV, PyTorch, TensorFlow, AI Agents

Databases & Tools: MongoDB, PostgreSQL, SQL, Docker, FastAPI

KEY ENGINEERING & RESEARCH PROJECTS

Food Safe - Full-Stack / AI Food Safety & OCR Platform (MERN, OCR, AI)

- Developed full-stack food information and label analysis platform assessing ingredient safety transparency.

Orchestrix AI Agent - Autonomous Intelligent Agent System (Python, FastAPI)

- Structured cognitive reasoning pipeline: Input -> Agent -> Reasoning / Workflow -> Action -> Output.

Pothole & Road Distress Detection - Computer Vision Research (YOLO, OpenCV, Python)

- Active research on Pothole-600 dataset evaluating road crack anomalies and Low/Med/High severity scoring.

AI Space Information Chatbot - Celestial Telemetry Explorer (Python, FastAPI)

- Interactive terminal interface delivering astronomical telemetry, spacecraft metrics, and planetary data.

MultiRecon - Multi-Modal Medical Imaging Research Concept (MONAI, PyTorch, YOLO, FastAPI, Docker)

- Academic research exploring volumetric segmentation across X-ray, MRI, and CT imaging formats (Non-clinical).

HONORS & LEADERSHIP

- Eureka Hackathon: 3rd Prize Winner for collaborative technological prototyping.

- National Talent Search Examination (NTSE): Qualified Level 1 & Level 2 National Merit.

- SOF / IMO Olympiads: Distinction standing in International Mathematics Olympiad.

- Class Representative: Elected representative for 60+ Computer Science Engineering cohort.

- ISRO Certification Program: Climate Change and Aerosol Management remote sensing course.
